

A Day in the Life: NZALC S6

New Zealand Army Leadership Centre · September 2026

Every course NZALC runs starts and ends here: the kit that leaves the store, and the kit that comes back.

1 THE RETURN

After a course, everything comes back at once: radios, cables, chargers, projectors, cases. Every item is checked, tested and accounted for before it goes anywhere near a shelf.

2 THE STANDARD

Cases labelled, batteries charged, cables coiled, every item in its place. The next course draws its kit in minutes, not hours.

ISSUE AND RETURN

Kit drawn for every course and checked back in on return, with faults tagged for repair rather than discovered in the field.

POWER AND CONNECTIVITY

Charging, cabling and communications, so instructors stay connected in the classroom and on the ground.

ACCOUNTABILITY

Every serial number tracked. Stocktakes and audits are met from the register, not from a scramble.
