

TWO CONTINUUMS. ONE LEADERSHIP FRAMEWORK.

One visual. The LDF is the common spine; the two Army promotion continuums are mapped against it, each box giving the development and the strength of its link to the career transition.

VISUAL LOGIC

Read across any row: same LDF transition, what does Army require of a soldier, what does it require of an officer? The comparison is no longer mandated versus not mandated: each box places the link on a scale from formally mandated to unconnected, because the evidence (the 9 Sep transcript, which governs over the generated notes) shows a spectrum. Heavy dashed boxes are where the gap bites. STATED 9 SEP: stated at the meeting, not yet verified. TO CONFIRM: a policy check is owed before the state can stand. Nothing here is asserted as a finding.

THE OFFICER DEVELOPMENT GAP

The shape of the gap: strong at commissioning, hollow in the operational middle, strong again at the top. Then the history, then COMDT’s question.

OFFICER CONTINUUM: STRENGTH OF THE LINK BETWEEN DEVELOPMENT AND THE CAREER TRANSITION

SOLDIER CONTINUUM AT THE SAME TRANSITIONS

The issue may not be an absence of leadership development. It is the absence of a consistently deliberate mechanism linking the right development to the right career transition.

HOW IT AROSE (FROM THE 9 SEP TRANSCRIPT; TO BE VERIFIED AGAINST THE AITC RECORD)

WHAT WAS TRIED

Intent and senior buy-in existed. Lead Leaders was attached to Grade 2 and 3 coursing for a two-year trial; the extra time away from units was judged untenable. A distributed model was preferred, leaving officers to schedule the development themselves.

WHY NO INTEGRATED SOLUTION EMERGED

Later restructuring and course redesigns proceeded without ACS at the table, so nobody looked at where the training should nest. Above Lead Leaders, delivery passed to ILD in 2012 and Army cannot guarantee seats.

THE ASSESSMENT OFFERED (CONTEXT, NOT ALC'S FINDING)

'A scheduling oversight in the face of tempo': when development is not formally required it is what gets displaced. Senior leaders, who all attend, may assume the same is happening throughout Army.

IS THIS A CONSCIOUS CHOICE?

IF YES:

What is the rationale for treating Officer and Soldier leadership development differently?

IF NO:

Should Army establish a more consistent mechanism for ensuring development occurs before increased leadership responsibility?

No recommendation. The organisation answers. Page 3 shows what 'no' would lead to, if asked.

VISUAL LOGIC

The band's thickness is the career-linkage level from page 1, so the waist is the finding: not soldiers developed and officers not, but junior development, a hollow operational middle, and strong participation again at the top, with CAPT to MAJ the sharpest point. The soldier strip keeps the asymmetry in view. The history is carried as context so the room does not retread it; the assessment offered at the meeting is not put forward as ALC's finding. The question stays the centrepiece.

CURRENT AND DESIRED: ONE PAGE

The future state the meeting described: course, transition, who delivers, and the linkage written into promotion policy. Detachable; tabled only if AITC asks what 'no' leads to.

LDF TRANSITION	SOLDIER: RANK	COURSE AND DELIVERY	LINKAGE NOW	DESIRED	OFFICER: RANK	COURSE AND DELIVERY	LINKAGE NOW	DESIRED
Entry Lead Self	Civilian > PTE	Lead Self; train-the-trainer (TAD, ACS)	Compulsory	No change	Civilian > OCDT	Lead Self; as for soldiers	Compulsory	No change
T1 Lead Teams	PTE > LCPL	ELDA + LDS Lead Teams; inside JNCO course (ALC)	Formally mandated	No change	OCDT > 2LT	ELDA + LDS Lead Teams; inside NZCC (ALC at OCS)	Formally mandated (embedded)	No change
T2 Lead Leaders	CPL > SGT	ELDA + LDS Lead Leaders; inside SNCO course (ALC)	Formally mandated	No change	2LT / LT > CAPT	ELDA + LDS Lead Leaders; distributed window after 2 years in unit (ALC)	Functionally required; not in policy	Formally mandated for substantive CAPT CHANGE
T3 Lead Systems	SSGT > WO2	ELDA Lead Systems inside WO course (ALC); LDS Lead Systems (ILD)	ELDA mandated; LDS to confirm	LDS prerequisite confirmed; ILD seats aligned to promotion timing CHANGE	CAPT > MAJ	ELDA Lead Systems (ALC); LDS Lead Systems (ILD)	Self-selected; not policed	Formally mandated before OC appointment CHANGE
T4 Lead Capability	WO2 > WO1	LDS Lead Capability (ILD)	Expected; policy to confirm	Formally mandated; ILD seat guaranteed CHANGE	MAJ > LTCOL	LDS Lead Capability (ILD)	Expected; policy to confirm	Formally mandated CHANGE
T5 Lead Integrated Capability	WO1 > Senior WO1	LDS LIC: ELDA week (ALC / Navy) + LDS week (ILD)	Expected; full attendance	Stated in policy CHANGE	LTCOL > COL	LDS LIC: ELDA week (ALC / Navy) + LDS week (ILD)	Expected; full attendance	Stated in policy CHANGE
T6 Lead Organisation	Senior WO1	LDS Lead Organisation + ELDA (ILD; contracted facilitation)	Expected; full attendance	Stated in policy CHANGE	COL > BRIG	LDS Lead Organisation + ELDA (ILD; contracted facilitation)	Expected; full attendance	Stated in policy CHANGE

WHAT CHANGES, AND WHAT DOES NOT

No new courses and no new money: ILD and NZLC already deliver every course on this page. The change is procedural: the linkage written into promotion policy at each transition, for both continuums, with ILD seat allocation aligned to Army promotion timing and the officer window placed after unit experience, not at OCS. Completion then becomes a reportable metric.

VISUAL LOGIC

Shaded DESIRED cells are the change; unshaded rows already match. Content is the future state as described at the 9 Sep meeting and is not an endorsed position. It exists to answer the AITC action 'develop a visual mapping of the current versus desired framework' and stays off the table unless the room answers page 2 with 'no'.
