

Individual Training

The Army Approach

APPLIES TO ALL ARMY INDIVIDUAL TRAINING

THE APPROACH

Army develops individuals progressively and continuously toward operational competence, balancing direction, practice, experience and learner agency according to risk, complexity, competence and operational need.

The standard is common; the journey to it need not be identical.

The Model

How Army develops the individual.

THE DECISION RULE

Progression is shaped by risk, complexity, learner competence and the required operational outcome

Individual training continues across a career through a recurring cycle:

The Principles

What the approach means in practice.

- 1

Operational competence
Performance to standard, not course completion.
- 2

Common standard, adaptive pathway
Adapt the pathway without diluting the standard.
- 3

Progressive development
Competence grows through practice, experience and feedback.
- 4

Increasing learner agency
Direction reduces as competence grows.
- 5

Continuous development
Learning extends beyond the course and across a career.
- 6

Outcome-led methods
Methods and technology enable the approach; they do not define it.
